

JANUARY 2022

BLANTYRE DISTRICT COUNCIL

**ANNUAL
INVESTMENT PLAN**

Foreword

The Annual Investment Plan (AIP) is an instrument through which development investments are coordinated and delivered in Malawi. Fundamentally is a prioritized list of development projects or programmes to be executed in a specified period within a year.

The Blantyre District 2022-2023 Annual Investment Plan (AIP) is an annual plan that outlines prioritized infrastructure and software development programmes for the district. This is primarily a product of a review of the 2021-2022 planned AIP in the 2017-2022 District Development Plan (DDP). It also took due cognizance of the trends in resource envelope as well as the history of project implementation in the district.

The Blantyre District 2022-2023 Annual Investment Plan was formulated based on the District Development Planning System and guidelines from Ministry of Local Government which are integral instruments in decentralized planning. That is, was formulated out of a very wide consultations and appraisals from both state sectors, non-state sectors and the citizenry.

The Blantyre District 2022-2023 AIP is aligned to the desires of national level PSIP which is a five year rolling plan that outlines the development priorities in infrastructure development of the country. It mostly links with micro projects or programmes as earmarked in central level plans. In this respect, Blantyre District 2022-2023 AIP is well aligned to The Malawi 2063 First 10-Year Implementation Plan (MIP 1) and the Country vision Malawi 2063 including the Sustainable Development Goals (SDGs).

It is, therefore, my utmost hope and appeal that all players in the district will strive to implement this plan in the 2022/23 financial year.

Councillor Carlo Mdala

Chairperson Development Service Committee

Acknowledgement

The Blantyre District 2022-2023 Annual Investment Plan has been made possible with valuable efforts of various stakeholders. The District Council followed the guidelines as provided by Ministry of Local Government.

The District AIP Taskforce was formed which facilitated the formulation of the plan through several activities that included consultation meetings with Civil Society Organizations, decentralized structures, local leaders, business community and other relevant stakeholders.

I, therefore, would like to acknowledge valuable contributions and concerted efforts of the District AIP Taskforce members which comprised Messrs: Bennet Nkasala, (District Commissioner), Joseph Bodole (Director of Public Works), Maxwell Mbulaje (District Environmental Officer), Tamala Zembeni (Acting District Monitoring and Evaluation Officer), Dustan Banda (M&E Intern), and Stanley Moyo (CSO Network Chairperson) among some members.

Special acknowledgements are also extended to Members of Development Service Committee for endorsing the Plan, the Full Council for approving the Plan, Directors and all members of staff in the council, ADC members, SCO members, local leaders and other stakeholders too numerous to mention by name for their active participation and contribution in the whole process of developing this AIP.

Tamanya M. Harawa

DIRECTOR OF PLANNING AND DEVELOPMENT

Executive Summary

Blantyre District Council is a body corporate established under the Local Government Act 1998, and National Decentralization Policy 1998. According to the Act, the Council is mandated to inter alia promote infrastructural and economic development through the formulation, approval and execution of council development plan. In this vein, Blantyre District Council has formulated a 2017-2022 Blantyre District Development Plan (DDP).

Blantyre District Development Plan is a medium term (5 years) development plan and a strategic development planning instrument which guides and informs all development planning, budgeting, management and decision making in the Council. It constitutes programmes and projects on yearly basis technically known as Annual Investment Plan. In accordance with the District Development Planning System, the AIPs ought to be reviewed yearly to reflect current development trends and emerging development issues. It is against this backdrop that the Council has formulated this 2022-2023 AIP.

The 2022-2023 AIP comprises an Implementation Matrix which highlight the priority projects/programmes and target areas where the projects will be implemented. Second, it presents the extract of the capital projects to be implemented under the District Development Fund and GESD. Third, it shows, 2021-2022 AIP as depicted in the 2017-2022 DDP.

It is envisaged that the 2022-2023 Annual Investment Plan will be instrumental in guiding the implementation of activities this Financial Year thereby contribute to the implementation of DDP and all national including International development agenda in the medium term.

Bennet Nkasala

DISTRICT COMMISSIONER

2022/2023 FINANCIAL YEAR PROJECTS OR PROGRAMMES IMPLEMENTATION MATRIX

C. MONITORING AND IMPEMETATION ARRANGEMENTS

Monitoring is an integral part of project implementation. Proper monitoring has a great bearing on the success of any kind of project and activity. Monitoring helps to establish the progress of implementation and identify successes, failures, strength, weakness and a lot of other things which inform implementers whether they are on track or not. It is through monitoring that measures can be put in place to ensure that developed plans are being implemented successfully by way of adherence to

implementation plan and how effective actions are as well as facilitating that observed issues that can counter the achievement of goals are addressed timely. It is against this background that the AIP includes an overview of monitoring plans. This section highlights how the activities are to be carried out.

a. Institutional Structures and responsibilities

Blantyre District Council has the capacity to monitor development policies, programmes and strategies through the M&E section and sub-district structures as described below:

i. District Level

The District Monitoring and Evaluation Coordination Committee (DMECC) is a sub-committee of the District Executive Committee (DEC) that has been entrusted with coordination of all M&E activities at district level. DMECC is a multisectoral committee which comprises data officer drawn from some sectors within the council and some representatives from CSOs. The DMECC will spearhead monitoring under supervision of the DEC. the District will also constitute a Contract management Team which will lead the project management activities. Furthermore, the DATs will anchor monitoring and development activities.

ii. Area and Village level

With the dawn of decentralization, development programmes, projects and strategies originate from the area and village level structure plans. The area and village level structures are responsible for initiating programmes, projects and strategies and this is done to ensure that interventions reflect community needs. The Area Executive Committee (AEC) is responsible for monitoring activities at community level. In AIP, the AECs in collaboration with relevant stakeholders will support monitoring at grass root level.
