

National Local Government
Finance Committee

Programme Based Budget (PBB) Guidelines for Local Councils

Acknowledgments

Appreciation goes to all individuals and institutions that contributed to the development of this Manual. In particular, the National Local Government Finance Committee (NLGFC) would like to express gratitude to the staff in the Social Policy Section of UNICEF, the District Commissioner (DC) and staff for Nkhotakota, Salima, Mchinji, Karonga, Rumphi, Mzimba, Blantyre, Lilongwe, Mangochi and Zomba District Councils, the Chief Executive and staff of Blantyre and Zomba City Councils and Mangochi Town Council and all the District Councils that participated in the process.

Mr. Yohane Nyanja, Mr. Jonathan Banda and Ms. Patricia Banda of NLGFC provided the technical backstopping to the process of developing the Manual. NLGFC would also like to acknowledge Mr. Peter Mwanza who was the consultant that facilitated the process and developed the manual. All those that worked in the background to make this exercise a success are appreciated.

This manual was developed through the assistance from UNICEF Malawi. NLGFC wishes to thank Mr. Bob Muchabaiwa, Mr. Kelvin Tapiwa Mutambirwa, Mr. Elton Edward, Mr. Alessandro Ramella Pezza, and Mr. Nkandu Chilombo for the technical, logistical and financial support which made developing this manual possible.

Introduction and background

1.1 Introduction

Malawi Government introduced the Programme Based Budgeting (PBB) in the 2015/16 financial year and the framework was piloted in a few Ministries. In the 2017/18 financial year, the PBB was rolled out to all LAs in Malawi. All local authorities (LAs) submit their budgets to the National Local Government Finance Committee (NLGFC) where they are consolidated for submission to Parliament for noting. To make the process smooth, ensure uniformity and for adherence to the PBB budget framework, the Ministry of Finance, Economic Planning and Development (MoFEPD) and NLGFC developed PBB templates that LAs are using to formulate their PBB and reports.

This Manual has been developed to guide LAs in formulation and reporting of PBB by giving instructions on how to fill in the PBB budget templates and what information to submit with the templates. This PBB guideline document will complement the already existing budgeting manuals, budget circulars and other budget guidelines for LAs in Malawi as developed and issued by the Ministry of Finance and NLGFC. When developing these guidelines, efforts were made to involve and get inputs from some LAs to ensure that the specific local situations are taken into perspective. The guideline therefore was developed through consultations and participation of LAs and NLGFC.

This document should be considered as a living document that could be reviewed and updated periodically based on emerging issues.

1.2 Background

LAs implement their functions using financial support from Central Government Transfers and from their own Locally Generated Revenues (LGRs). The LAs also get funding outside the budget from the different Non-Governmental Organisations (NGOs) and development partners operating in their councils. This complicates the PBB reporting as LAs tend to report on all results achieved through both on-budget and off-budget resources. It is recommended that LAs should only report the results obtained from using on-budget resources. PBB execution and reporting is supposed to assist LAs to self-audit and account for results based on the resources availed to the LAs by the Government.

1.3 Rationale for PBB

The Government adopted the PBB to enable all its agencies, including LAs, to shift from accounting for money to accounting for results, which makes the budget more effective in tackling the development problems that LAs face. Effective PBB formulation, implementation and reporting will assist the LAs to prioritize their expenditure on interventions that bring the best results or most returns from resources given by the Government in a particular year.

The PBB templates given to the LAs are supposed to ease the process of budget formulation and reporting on the results from implementing the budget. The PBB templates also help LAs to align their developmental efforts to national and the LAs' priorities as enshrined in the Malawi Growth and Development Strategy (MGDS) III and district development plans (DDPs) and strategies.

1.4 Use of the Manual

The manual is for the district, municipal, town and city council and has been designed for use by all the officers that are responsible for budget formulation, implementation and PBB reporting. Specifically, the manual should be used by: the head of the sectors and departments, the budget task force, the finance personnel and all officers that handle the PBB at LA level. The elected officials, i.e. the councilors, should familiarize themselves with the manual for them to effectively discharge their oversight roles in their respective LAs.

The manual has been developed to provide a step by step process of filling in the PBB templates and should be used by LAs as an instructional and reference manual for PBB.

PBB Budget Formulation

2.1 PBB Guidelines and Templates

As part of the of the budget formulation process, the Ministry of Finance in collaboration with NLGFC provides standard PBB templates for LAs to use in formulating their budgets. In addition, the ministry annually prepares and circulates Budget Guidelines which contain the principles, procedures and technical instructions for the preparation of the Budget. The efforts are aimed at ensuring that there is consistency and coherence in the PBB preparation process for all Government agencies for ease of budget consolidation and comparison.

It is therefore important that when coming up with PBBs, LAs follow the existing Government and LAs' budgeting procedures based on the existing laws and regulations. The MoFEPD and NLGFC will from time to time give guidance through issuing various budget instructions, circulars and PBB templates to assist the LAs to come up with uniform PBBs.

PBB uses the Medium-Term Expenditure Framework (MTEF), hence the LAs that are budgeting for a particular year, should, use economic projections and current financial trends to come up with near the truth budget estimates for the following 2 outer years on a rolling basis.

2.2 Circulation of Budget Ceilings

The Ministry of Finance through the NLGFC circulates MTEF budget ceilings for the LAs. The LAs are expected to adhere to the circulated ceilings and develop their budgets accordingly.

The responsible staff in the respective LAs should formulate the budget for each programme and sub-programme using the given templates and ensuring that estimates are in line with budget ceilings as circulated by the NLGFC.

2.3 Coordination of the PBB Process at District Level

The PBB process should be coordinated by the District Commissioner (DC)/Chief Executive Officer (CEO) in collaboration with the Director of Planning and Development (DPD) and the Director of Finance (DoF), with the DC or the CEO providing the leadership and oversight. The DC should spearhead the formation of a multi-sector Budgeting Task Force which should be responsible for coordination of the PBB for the LAs every financial year. The Taskforce should consist of the following: DPD, DoF, Monitoring and Evaluation Officer (M&EO), Director of Administration (DoA), District Education Manager (DEM), District Health Officer (DHO), District Agriculture Development Officer (DADO) and other officers as may be deemed fit by the DC and district management team. The LAs should ensure that the budgeting task force is gender sensitive and consist of experts who will take care of the interests of marginalized groups. The Ministry of Finance and NLGFC conduct budget briefing sessions for LAs every year and the members of the budgeting task force are encouraged to attend. The Taskforce is obliged to brief all the devolved sectors soon thereafter.

2.4 Filling in the Budget Templates

The NLGFC has produced a standardized PBB template, adapted from the Central Government template that was issued by the MoFEPD. All LAs are expected to strictly use the standardized template when formulating their PBBs as the use of a different template is not acceptable.

Specific Instructions

Numbering and Titles:

Century Gothic, size 12, CAPITALIZED

The body of the text, sections 1 through 10:

Century Gothic, size 11, 1.0 spacing and left aligned

Please ensure all bullets and titles are correctly aligned to each other, in line with the template you receive.

Within Tables:

Century Gothic, size 9, numbers right aligned, text left aligned, all totals and programmes should be embodied

It is imperative that the LAs ensure that all the given spaces in the budget template are filled in correctly. The first responsibility for ensuring that this is done properly rests with the officers assigned to develop the budget for the year in question, which can be easily done by following the instructions in this manual. The second responsibility rests with heads of sectors and heads of departments to cross check. The budget task force that consolidates the budget at the council level is also supposed to take a keen look at all the submitted budget estimates to ensure that the various sectors and departments have filled the templates to the required standard.

2.5 Basic Information of the Council

The first part of the PBB template requires the LAs to fill in basic information for their respective councils. All LAs are therefore asked to fill this part in a uniform manner. The example below gives guidance on how to fill in the basic information for the council.

EXAMPLE

Name of Council: (After defining council, delete "Name of council")

Vote number: 923

Controlling Officer: District Commissioner

1. MISSION:

To provide sustainable, top quality socio-economic development services to local communities through community empowerment and implementation of demand driven programmes in transparent and accountable manner.

2. STRATEGIC OBJECTIVES:

- Increase revenue collection for quality service provision in the council
- Increase community awareness and capacities on environmental issues
- Reduce maternal deaths
- Attained food security at district and household level

3. MAJOR ACHIEVEMENTS IN 2018/19

4. PROGRAMME ISSUES

5. PROGRAMME STRUCTURE

2.5.1 Filling in Council's Basic Information

As indicated in the example above, the first thing on the template should be the name of the council and all other words should be deleted. "The Vote Number" for the council should then be inserted as shown above. For the controlling officer, the LA should indicate the District Commissioner or Chief Executive Officer as shown above, – the LAs should NOT put the name of a District Commissioner in the space provided, but simply the title of District Commissioner, since District Commissioners can be rotated.

Mission: The Mission is related to the mandate and should therefore state the enduring statement of why the LA exists (its business), what goal it sets out to achieve and the approach that it will take in achieving its goals. The example above shows how the mission should look like. The mission, however, should be aligned to what is used in the other strategic documents for the LAs.

Strategic Objectives: Are long- and medium-term goals that the LAs will achieve through implementation of the programmes in the PBBs. The logic is that as the LAs implement their strategic objectives spelled out in the budget statement, they will fulfill their mission and mandate.

2.5.1.1 Coming up with Strategic Objectives

- ✓ Based on the unique challenges each LA has, the strategic objectives therefore should be those that the LA would like to achieve over the short, medium and long term, through implementation of the several interventions in the different functional areas;
- ✓ For the budgeting period in question, the LAs should identify up to 5 strategic objectives that they will pursue over the budget period;
- ✓ LAs are encouraged to develop multi-sectoral objectives based on their developmental needs. For example: Improve the health status of the communities or increasing the income of the communities;
- ✓ Since a budget runs for only a year, LAs are free to pursue specific strategic objectives – could be sector objectives and then migrate to other objectives in the next year;
- ✓ These strategic objectives should be aligned to what the LA uses in all other existing development plans and strategic documents such as the DDP or the district strategic plan, wherever applicable;

- ✓ The LAs should not introduce totally new strategic objectives for the budget year, but should use the already agreed upon -objectives those from the Strategic Plan or DDPs or any other document that is used as a development guideline for the LA. This will help to align the PBB objectives with the national development objectives;
- ✓ The LAs, should, however make sure that the strategic objectives are making sense and are SMART.

Important: The objectives should be linked to the district and national objectives as enshrined in the district and national strategies through localization of the MGDS objectives. It is therefore very important that LAs regularly update their strategic documents so that the vision, mission and strategic objectives that are used in the PBB are up to date and relevant.

Major Achievements: What the LAs managed to achieve using the budget. Under this heading, the LAs are required to list the key achievements that they have so far achieved up to the time of formulation of the new PBB, which is in the last 9 months.

2.5.1.2 Identifying and Listing Major Achievements

- ✓ The LAs should only list achievements that have been attained using on-budget resources and NOT achievements realized through use of other resources;
- ✓ The list should be in bullet form and should not exceed 8 points;
- ✓ The LAs should only choose achievements that are significant and should be quantified where possible;
- ✓ **Example of major achievements are:**
 - Reduction in maternal deaths by 12%
 - Reduced girl dropout rates in primary schools by 10%
 - Immunisation of all children in the LA
- ✓ The major achievements should correspond to the interventions or activities that were implemented using the budgeted resources. They should not come from nowhere.

The major reasons the LAs are asked to list major achievements is to accord them an opportunity for self-reflection regarding the use of public resources as well as to let them show how much they performed using the resources they were funded. It is not a competition, so LAs should not come up with a list for the sake of it but they should be honest and objective in listing the key achievements.

Programme Issues

Under “Programme Issues”, LAs are required to list, in bullet points, major issues affecting implementation of programmes in the PBB as experienced in the current budget year i.e. the previous 9 months. The major issues could be technical or policy challenges that were met during implementation of the budget. For each issue, LAs are encouraged to list measures they so far instituted to resolve or address the issues.

2.6 Developing the Programme Structure

This is the central part in programme formulation. In the programme structure template, the programmes and sub-programmes are already provided by NLGFC but the LAs are supposed to fill in the blanks with information as indicated in the different columns. The programmes and sub-programmes should not be changed!

2.6.1 Considerations

- ✓ If a LA finds that a programme does not apply to them, it should leave it blank– this means that the LA should not delete the programme from its PBB template but leave it as it is;
- ✓ However, if the programme is applicable, but no resources were allocated in that year, the LA should put a zero (0).

Example of a Filled in Programme Structure Template

Budget by Programme and Sub-Programme (MK 000'000s)

No.	Programme/ Sub-programme title	2018/19 Approved	2018/19 Revised	2019/20 Estimates	2020/21 Projection	2021/22 Projection
04	Water Resources Development, Management and Supply	120.50	140.96	177.57	200	213
04.04	Water supply and sanitation	120.50	140.96	177.57	200	213
15	Security Services	500	600	500	100	100
15.09	National Registration and Identification	500	600	500	100	100
18	Labour, Employment and Manpower Development	125.12	145.26	181.91	199.68	204
18.07	Employment and Labour Relations Services					
18.08	Workers' Compensation Services	25.12	25.26	28.61	30.68	32
18.09	Child Labour Elimination Services	100	120	131	144	145
18.10	Occupational Safety, Health and Welfare	0	0	22.30	25	27

2.6.2 How to fill in the Programme Structure Template

The screen shot above shows an example of the filled in programme structure template. LAs should observe the following when filling in their respective programme structure component.

- ✓ The LA should use the right codes for programmes and sub-programmes;
- ✓ LAs should remove excess details where such are found;
- ✓ Where there is a programme, the sum of allocations for the sub-programmes under such programme should equal to the allocation for the programme - for example the allocations for Labour, Employment Manpower Development is equal to the sum of the allocations to the sub-programmes under it in the example above;
- ✓ Where the programme does not apply for the particular LA – it should be left blank – the example, above shows employment and labour services being left blank;
- ✓ Where the programme or sub-programme applies but no resources were allocated, the LAs are supposed to put a zero. Occupational and Safety Sub-Programme in the above example is showing zero allocation meaning the sub-programme is relevant but nothing was budgeted for in that particular year;
- ✓ The allocations are in Million Malawi Kwachas. The (MK'000,000.00) bracket denotes that all the figures depicted in the table are in millions for example, the allocation for 2019/2020 sub programme 04.04 Water Supply and sanitation is shown as 177.567 in the example template above, meaning it is MK177,567,000.00 Malawi Kwacha. The template simply calls on LAs to fill in figures that are in millions. This should not be changed in the template.

2.7 Medium-Term Expenditure Framework

PBB uses the MTEF which entails that while the LAs are budgeting for that particular year, they should also budget for the two outer years using the MTEF ceilings that are provided by the NLGFC. The example above shows the projections for two outer years (2020/21 and 2021/22). If the MTEF ceilings are not provided in time, LAs should provisionally make projections for two outer years using observed trends for the past few years.

2.8 Distribution of Resources among Different Sub-Programmes/Functions

For all devolved functions, the LAs get ceilings for the sector and not necessarily per programme, hence it is up to the management of the sector to objectively and fairly allocate the resources among the sub-programmes or functions for effective service delivery. When allocating these resources, the responsible officers especially the heads of the sectors and departments should consider the following:

- ✔ What are the priority programmes and sub-programmes for the sector and the LA;
- ✔ For programmes and sub-programmes that straddle several sectors, the concerned sectors should sit down and design a collaborative arrangement;
- ✔ Planned workload for the programmes and sub-programmes;
- ✔ Resource requirements of the programmes and sub-programmes - resources loads;
- ✔ Human resources and other supporting resources for carrying out the planned activities in the programmes and sub-programmes.
- ✔ The NLGFC and the line Ministries are always available for consultations and advice on allocation of resources amongst the programmes in the sectors and departments.

2.9 Setting Targets and Identifying Outputs for PBB

LAs are supposed to set targets and discern outputs that will be created through implementation of the PBB activities in various programmes and sub-programmes. The LAs should set targets and outputs which they aim to achieve in a budget year. The targets being set for the estimates should make consideration of the projected targets from the previous year's PBB and not completely different. The targets should be numbers or percentages or a given unit of measure of what the LA plan to reach or attain in the year.

The targets that LAs put in the template should relate to those that will be attained through funding from the budget and not any other resources from outside the budget. The reason for this is that Government and indeed the LAs themselves should appreciate and account for what the funds in the budget have been able to achieve for that particular year. An example of a filled in target template is given below for ease of reference.

Programme 95: Sports and Culture

Objective: To promote and develop sports for all and safeguard and preserve Malawi's cultural heritage.

Output Indicators	2017/18 Actual	2018/19		2019/20 Targets	2020/21 Projection	2021/22 Projection
		Target	Prelim			
Sub-programme 95.01: Sports Development						
Output: Sports Management Improved						
Number of people participating in sports	2500	3000	2400	4500	5000	5800
Number of coaches trained	10	12	6	10	10	10
Number of athletes trained in sports skills	90	150	121	200	240	250
Number of officials trained in sports administration	32	50	25	30	35	50
Number of talented athletes identified	16	20	12	25	20	25
Number of schools practicing PE and sports	140	150	140	150	150	150
Number of schools provided with sports equipment	3	5	4	10	10	10

2.9.1 Developing Targets for the LA

- ✓ The LA should indicate the programme number and name in the first row;
- ✓ The second row should indicate the output;
- ✓ The first column in the template has indicators – this is given;
- ✓ The LAs have to fill in the actual achievement in the previous year in the second column;
- ✓ The third column should contain the current targets;
- ✓ LAs should fill in the targets achieved in the current year (usually 9 months) in the fifth column;
- ✓ The sixth column should contain targets for the year being budgeted for;
- ✓ The seventh and eighth column should contain the projected targets for 2 outer years;
- ✓ Targets should be numbers, percentages or a given unit of measure, not explanations and should not be vague;
- ✓ Quarterly targets are an aggregation of 3 months targets e.g. sum of targets for July, August and September constitute first quarter targets.

Note: Targets put into the budget template should make sense i.e. should be those that the LA can realistically pursue and achieve. It is advised that to come up with realistic targets, recent trends and historical perspectives should be used. These targets should be based on the Other Recurrent Transactions (ORT) ceilings and allocations and the levels should be broadly agreed upon by all sectors /departments.

Preliminary targets are those that have been achieved at the point of preparing estimates for the next financial year

2.10 Programme Budget by Item

Government and other development partners strive to get a deeper understanding of what and how the LAs use resources when implementing their programmes. It is also in the interest of LAs to pin point and understand their expenditure patterns so that they are able to make decisions on proper use of their resources. The Budget by Item template basically calls upon the LAs to give information on what items they spent their money

on. The information to go into the programme budget by item is generated from an excel input sheet that is given by NLGFC. The LAs should simply aggregate all the expenditure information for each item in the input sheet and transfer to the programme budget by item template. The template example below gives direction on filling the budget by Item template.

Example: Programme Budget by Item

Programme 69: Gender Equality and Economic Empowerment (MK 000'000s)

Code	Description	Year 2018/2019		2019/20 Budget Estimate
		Approved	Revised	
21	Internal travel	.81	.81	.80
23	Public Utilities	.57	.57	.30
24	Office Supplies	.32	.32	.28
33	Other goods and Services	.40	.40	.14
34	Motor Vehicle Running Expenses	.15	.15	.93
41	Aquisition of Assets	0	0	.43
50	HIV and AIDS interventions	.15	.15	.06
Total		2.40	2.40	2.93

Source: Consolidated LAs PBB 2018/19, V 1

2.10.1 How to fill in the template

- ✓ The first column requires that the LAs fill in the item code as taken from the budget;
- ✓ The second column gives the items where resources are spent on – this is given;
- ✓ The third column should contain the figure for the approved budget for the line item in the current budget year;
- ✓ The fourth column should be filled in with the revised budget for the current budget year;
- ✓ The fifth column should contain budget estimates for the financial year being budgeted for;
- ✓ The zero on acquisition of assets denotes the fact that there was no amount budgeted for that item for that particular year.

From the example on Programme 69: Gender Equality and Economic Empowerment above, which is a real example from the budget for one of the LAs, one can clearly see that not much of Gender Equality and Economic Empowerment was done under the programme. This information should act as self-audit information for LAs if properly done. LAs should therefore strive to effectively fill in the template and also use the information to improve their budgeting.

2.11 Programme Budget by Government Financial Statistics (GFS)

Immediately after filling in the programme budget by item template, the LAs are required to fill in the programme budget by GFS for the same programme. The information for GFS is generated from an excel input sheet which is availed to the LAs by NLGFC. GFS are required by the Government for standardization of the format for keeping national budget statistics which can be compared internationally. The extract below shows Programme 69 by item filled template and immediately following is Programme 69 by GFS filled template. This is aimed at comparing what went into the target service provision or development interventions against acquisition of goods and assets, wages and salaries. The GFS information is for Government statistics.

Example: Budget by GFS

Programme 69: Gender Equality and Economic Empowerment (MK 000'000s)

Code	Description	Year 2018/19		2019/20 Budget Estimate
		Approved	Revised	
201	Wages and Salaries			
202	Goods and Services	2.40	2.40	2.50
203	Routine Maintenance of Assets	0	0	0
206	Grants	0	0	0
401	Acquisition of fixed Assets	0	0	0.43
Total		2.40	2.40	2.93

2.11.1 How to fill in the Programme Budget by GFS

- ✓ The programme code and the descriptions are given in the template;
- ✓ The LAs are supposed to fill in the third column - approved figures for the budget year;
- ✓ The LAs should put the revised budget figures for the year in the fourth column;
- ✓ The last column should contain the budget estimates for the new financial year being budgeted for.

Note: The detailed instructions on how to extract the information for programme budget by GFS and item are appended in Appendix I at the end. The Programme Budget by GFS should be filled for all programmes and it should be immediately below the programme budget by item.

2.12 Programme Budget by Cost Centre

The LAs are supposed to provide a summary of information relating to the budget by cost center. The budget ceilings are given on cost center basis and the cost centers split the budget into different programmes based on the priorities therein. The template below should be filled with information on the programmes and summarized for the cost center. In some cases, the cost centers will have several programmes while in others there would be one programme – the amount of allocations for the different programmes should be added up to come up with the total allocation by cost center. The example below shows the budget by cost center.

Programme Budget by Cost Centre

Code	Cost Centre	Year 2018/19		Year 2019/20 Estimates
		Approved	Revised	
001	Headquarters	470,759,426.00	494,297,397.30	517,835,368.60
	Management and Admin	50,009,000.00	52,509,450.00	55,009,900.00
	Local Authority Services	60,000,000.00	63,000,000.00	66,000,000.00
	Local Revenue	43,000,000.00	45,150,000.00	47,300,000.00
	Local Development - CDF	65,800,300.00	69,090,315.00	72,380,330.00
	Local Development - DDF	251,950,126.00	264,547,632.30	277,145,138.60
002	Agriculture	34,000,000.00	34,200,000.00	39,100,000.00
	Agriculture Productivity Improvement and Risk Management	30,000,000.00	30,000,000.00	33,500,000.00
	Sustainable Management of Agricultural land	2,500,000.00	2,500,000.00	3,700,000.00
	Crops Development	1,500,000.00	1,700,000.00	1,900,000.00
003	...	...	...	...
005	...	...	...	...
Total		504,759,426.00	528,497,397.30	556,935,368.60

2.12.1 How to Fill In the Programme Budget by Cost Center

The LAs should use the information in the programme structure for the names of the programmes to use in this section.

- ✓ The LA should for each cost center identify the programmes;
- ✓ The LA should fill in the amount of the approved budget in the third column for the cost centre and the accompanying programmes for the current budget year;
- ✓ The fourth column should contain the revised budget amounts for the cost centre and the subsequent programmes for the current budget year;
- ✓ The fifth column should be filled in with the budget estimates for the year being budgeted for;
- ✓ All these should be added to show the total amount of budget for the cost centre;
- ✓ The amounts here should be written in full.

Note: The names of the programme put in this template should be the same as those used in the other sections starting from the programme structure. New programme names should not be introduced in this section.

2.13 Personnel Information

The section on personnel information requires all the LAs to fill in the template giving breakdown and details of personnel available at the LA for functions with devolved Personnel Emoluments (PE). An example of a filled in template is given below for ease of reference.

Personnel Information**Table 8.1: Staffing Profile by Grade**

Grade	Authorized Establishment	Filled Posts as at 1st July 2017			Estimated Posts as at 30th June, 2018	Cost of Estimated Posts 2018/19 (MK)
		Male	Female	Total	Total	
A						
B						
C						
D	1	1	0	1	1	10,562,904
E						
F	15	7	3	10	10	49,008,480
G	33	16	4	18	18	36,710,088
H	178	29	13	39	39	45,801,588
I	489	150	79	229	229	169,417,152
J	729	441	240	681	681	73,616,088
K	2362	1137	751	1888	1888	2,516,660,904
L	3586	1345	1305	2650	2650	141,398,592
M	588	315	586	1168	1168	1,551,067,290
N	138	45	50	95	71	60,775,860
O	145	106	42	148	117	95,581,332
P	416	194	159	353	353	276,906,936
Q	12	12	3	15	8	6,088,632
R	100	136	62	198	101	75,039,996
Chiefs	80	40	20	60	70	10,000,000
Total	8,792	3,934	3,297	7,493	7,334	5,118,635,842

2.13.1 How to fill in the PE template

- ✓ The first column gives a list of the grades in the civil service and this should not be changed;
- ✓ The second column requires the LA to fill in the authorized establishment;
- ✓ Each LA should fill in the number of personnel in place on each grade broken down into male and female as at starting of the budget year which is 1st July in column 3 and 4 respectively;
- ✓ The numbers filled in should be based on the number of personnel available at that time;
- ✓ The LA should then fill in the estimated number of personnel on each grade as at 30th June of the budget year;
- ✓ Column 7 should contain the cost for the posts as experienced in the previous budget year;
- ✓ Note that the numbers for personnel in place may vary because of attrition i.e. staff getting out and into the LA's establishment due to various reasons within the year;
- ✓ The numbers filled in should be balanced to the PE ceilings as provided by NLGFC;
- ✓ LAs should ensure this table is FULLY complete when submitting their PBB template;
- ✓ LAs should also make provision for chiefs separately (as shown above) because at the moment their grades are not set and therefore would be difficult to fit in the current template;
- ✓ LAs are asked to budget PE for all officers under relevant cost center and programme.

2.14 Capital/Development Budgets

The template on capital budget for projects calls upon all LAs to fill in information on all projects that the LAs are implementing and planning to implement for the budget year. The capital budget template has sections for District Development Fund (DDF) projects, Constituency Development Fund (CDF) projects, International Development Fund (IDF) projects, City Infrastructure Roads Project (IBCL facility) and locally generated revenue

projects. The example of a filled in template is given below for ease of reference. LAs are encouraged to budget for projects that span a single budget year. However, the template takes care of projects that go beyond a single budget year.

Example: Capital Budget by Project (MK 000'000s)

Project title	Start date (Month/ Year in digits)	End date (Month/ Year in digits)	Total Es- timated Cost	Total Costs to Date	2018/19		2019/20	2020/21	2021/22
					Approved	Revised	Estimates	Planned	Planned
DDF Projects									
Programme 60. Local Development									
Construction of slaughter house at Masese	07/2018	09/2020	16.8	8.8	10.1	9.6	2.5	0	0
Construction of Nambuna Bridge	8/2019	6/2020	16.0	12.0	16.0	16.0	0	0	0
Sub-Total			32.0	20.8	26.1	25.6	2.5	0	0
CDF Projects									
Programme 60267 Mzimba Hora Constituency									
Construction of 9 Access bridges	5/2017	12/2022	40	17.4	10.0	9.2	10.0	3.4	0
Rehabilitation of an orphan center	10/2018	6/2019	3.2	2.0	3.2	2.0	1.2	0	0
Sub-Total			43.2	19.4	13.2	11.2	10.2	3.4	0
IDF Projects									
Programme 23. Local Development									
Construction of school block at Maso	09/2019	06/2020	14.0	10.5	14.0	14.0	0	0	0
Construction of Teachers House at Jende	07/2019	06/2020	6.0	4.3	6.0	7.0	0	0	0
Sub-Total			20.0	14.8	20.0	21.0	0	0	0
Boreholes									
Programme 04.Water Resources Development Management and Supply									
Construction of Boreholes in the district	07/2019	06/2020	600	440	600	600	650	700	700
Sub-Total			600	440	600	600	650	700	700
Locally Generated Revenue Projects									
Programme 60 Local Development									
Construction of access road to mpanjira	09/2019	02/2020	8.0	8.0	8.0	8.0	0	0	0
Sub-Total			8.0	8.0	8.0	8.0	0	0	0
Total			703.2	503	667.3	665.8	662.7	703	700

2.14.1 How to Fill in the Capital Budget for Projects Template

- ✓ LAs should ensure that all projects being funded under DDF, CDF, IDF, City Infrastructure roads projects and locally generated revenue projects are included in the capital budget for projects template. The LAs should ensure that all the projects included in this template are properly aligned to their respective programmes;
- ✓ The example template given above has two rows but LAs should increase the rows depending on the number of projects they have under each programme.

Filling in the template

- ✓ For all the projects, the LAs should indicate the programme number under which the project is budgeted and a description of the project in the row indicated "Programme No. and Description" shown in the example above. The programme description should give the information on programme under which the project is budgeted;
- ✓ The project title should be indicated in the first column for each programme;
- ✓ The second column should indicate the date when the particular project started using digits as shown in the example;
- ✓ The third column should indicate the date when the project will end and the LAs should use digits for the date as shown in the example;
- ✓ The fourth column should contain the estimated cost of the project for it to be completed;
- ✓ LAs should indicate in column five, how much has been spent on the project up to the date of formulation of the budget – usually in the ninth month of the budget year;
- ✓ The sixth and seventh column should indicate what was budgeted for the project in the current budget and what was the revised budget for the budget year, respectively;
- ✓ The eighth column should contain the budget estimates for the coming budget year;
- ✓ The ninth and tenth columns should contain the planned budgets for the 2 outer years, respectively;

- ✓ On the last row for each programme, the LA should add up the figures under each programme to give the programme sub-totals;
- ✓ LAs should only fill in the relevant parts of the template, for example City Councils are not supposed to fill in the DDF part because it is not applicable to them.

2.15 Costing the PBB

Costing is a method of estimating each unit of expenditure within an activity. The LAs are encouraged to estimate the cost of activities and services as closely as possible. There are different methods that the LA can use to cost their activities.

2.12.1 Suggested Costing methods

Price x Quantity - This is derived by multiplying price by the estimated quantity;

Trend - When recent years show a persistent increase or decrease the council should use the trend to get the cost;

Average - When recent years do not show a clear trend (annual increase or decrease but an erratic pattern) the LAs should use average prices;

Lump Sum - This should be used when there is no indication that there will be a substantial increase or decrease in future years;

One-off - When an expenditure will not occur in each year of the MTEF but in one single year.

2.16 Cash-flow and Cash-flow Preparation

2.16.1 Preparation of Cash-flow

During the implementation of programmes, the LAs are expected to prepare cash-flows for the year in question. All the sectors including the headquarters should prepare these cash flows which are eventually consolidated by the DoF or the Chief Accountant. These cash flows depict the amounts of financial resources the sectors expect for each month of the 12 months being budgeted for. Estimation of these monthly figures should be in synch with the procurement plans of the sectors. The sector heads and departmental heads should prepare cash-flows for all the programmes and submit them to the DC for consolidation and eventually for forwarding to the NLGFC for further consolidation at national level.

**Example: Filled in Cash-flow Template
Funding Cash Flow Template 2019/20**

No.	Program	Sector/ Category	Approved Budget	CASHFLOW											
				Jul 2019	Aug 2019	Sep 2019	Oct 2019	Nov 2019	Dec 2019	Jan 2020	Feb 2020	Mar 2020	Apr 2020	May 2020	Jun 2020
4	Water re- sources develop- ment, manage- ment and supply	Water													
15	Security Services	NRB	12,400,000	1,600,000	1,300,000	1,300,000	1,500,000	1,300,000	800,000	500,000	1,500,000	700,000	700,000	700,000	500,000
18	Labour, employ- ment and man- power develop- ment	Labour	71,500,000	3,000,000	3,500,000	3,000,000	3,500,000	3,000,000	3,500,000	3,000,000	4,000,000	3,000,000	4,000,000	35,000,000	3,000,000
20	Manage- ment and adminis- tration	General resource fund	28,200,000	1,000,000	1,000,000	1,600,000	900,000	900,000	900,000	9,000,000	9,000,000	700,000	1,000,000	1,200,000	1,000,000
			5,660,000	180,000	200,000	200,000	300,000	200,000	3,000,000	250,000	300,000	250,000	180,000	300,000	300,000

2.16.2 Estimating Monthly Cash Flow and filling the Cash-flow template

- ✓ To effectively estimate the cash requirements for each month, the LAs' Heads of sectors and departments should breakdown the programme into activities and schedule them for a year and the cost of activities falling under each month should go into the cash-flow for that particular month;
- ✓ Cash flow for the month should correspond with capacity available to implement the activities within the month;
- ✓ Cash flow for the month should be based on the workload for the month;
- ✓ LAs are required not to front load the cash flows for the various sectors including development projects such as DDF, CDF etc. Front loading of cash flows means requesting all the resources estimated annually within a few months of the financial year e.g. 6 months. There are few exceptions that are considered for this where those budget lines are seasonal and prior agreement has been made with Ministry of Finance. For example, the Farm Input Subsidy Programme (FISP), Teaching and Learning Materials and School Improvement Grants;
- ✓ NLGFC provides an accompanying monthly cash-flow excel template to LAs for calculating and deriving cash-flows;
- ✓ Experience has shown that there are variances between cash-flow requirements and the actual resources that are available to the LA for implementation of the activities in the work-plan. It is recommended therefore, that the sector and department heads always meet and prioritize activities to be implemented in light of the available resources for each month.

2.17 Additional Information for PBB

Successful PBB encourages stakeholder participation and contribution including participation and contribution of local community both to the formulation process as well as implementation and monitoring and evaluation. It is recommended that the LAs should consult widely when coming up with the functions to be budgeted for, i.e. the information that go into the programme structure should contain development needs of the communities in the LAs as well as priority areas for interventions identified by communities. Devolution of more resources is required to effectively address the needs and aspiration of the communities in the participatory budgeting process.

It will therefore be assumed that at the time of filling in the template for programme structure, LAs would have already consulted the Area Development Committees, the Village Development Committees, the Development Partners, neighborhood groups, politicians and all other interested parties on the upcoming budget. The consultations entrench the spirit of decentralization and principles of democracy.

2.17.1 Gender and Prioritisation of Children and Other Marginalized Groups

In coming up with PBB, LAs should ensure that the needs and challenges of the women, men, girls, boys, children and any other marginalized groups are taken on board and resources are provided for in the PBB to address them. The starting point is to assess the situation of these groups right from the consultation processes. Since LAs have different needs, the PBB process should involve the gender experts in coming up with interventions to ensure that gender is mainstreamed in all programmes.

Some Guiding questions include:

- ✓ What are the specific needs of children that require addressing in the PBB?
- ✓ What are the specific needs of the women, men, youth and other marginalized population?
- ✓ What are the current efforts focusing on the disadvantaged population?
- ✓ What has been the performance of the previous budget regarding addressing the needs of the marginalized population mentioned above?
- ✓ What interventions are most likely to benefit the children, women, men, girls, boys and other groups more?

Reporting on the PBB

3.1 Introduction

For effective functioning of PBB, reporting of expenditure and the results that are achieved is very crucial. In this regard, LAs should ensure that data on finances, inputs, activities, outputs and outcomes are systematically collected, analyzed and stored using the LAs' M&E system. This then becomes the source of information when undertaking PBB reporting where budget performance reporting is required. LAs should prepare and submit to NLGFC a quarterly PBB report. The DC and CEO as controlling officers should ensure that this is done on time.

The first template is for reporting how the budget was disbursed in comparison to the budget estimates for all programmes in the budget. The template calls upon the LAs to show how much was budgeted and how much was actually funded in the current financial year. The following table gives the explanations for the various components in the Programme Summary and Disbursement Template.

Explanation of Programme Summary and Disbursement Template Components

No	Programme/ Sub-Pro- gramme Title	Approved Budget	Cumulative Cash Flow	Cumulative Funding	Funding as a % of cash flow	Funding as % of Annual Provision
Code	Indicate the name of the Programme under consideration	Indicate how much has been allocated to the programme	Indicate how much was planned as cash flow up to the reporting time	Indicate how much funding has so far been disbursed for the programme	Calculate the % of funding to cash flow Funding/cash –flow X 100	Calculate the % of what has been disbursed to what was in the budget for the year
		Example 200,000.00	Example 198,000.00	Example 150,000.00	Example 150,000.00 / 198,000 X100	Example 150,000 / 200,000 X100

3.1.1 Filling in the Programme Budget Summary and Disbursement Template

The programme budget summary and disbursement gives a list of all the programmes that the LAs implement with their respective codes. These should not be changed.

How to fill in the template

- ✓ The LAs should fill in the first column with the approved budget figures for each programme and sub-programme for the current budget year;
- ✓ The second column “cumulative cash-flow” should contain cumulative amounts of funds that were planned or put in the monthly cash-flow to be used up to that point, based on the monthly cash-flows prepared – this is what the council wanted to use monthly, as communicated through the cash-flows that were prepared. For example, if we are reporting in September 2020 then cumulative cash-flow will be addition of the monthly cash flow amounts in this case July + August + September Cash flow that were prepared;
- ✓ The third column “cumulative funding” requires the LA to fill in the funding amounts/levels received over the reporting period in the financial year. For example, if a LA received MKK100,000.00 in July, MK400,000.00 in August and MK240,000.00 in September, the cumulative funding will be the sum of these amounts. Cumulative funding therefore = MK100,000.00 + MK400,000.00 + MK240,000.00 = MK740,000.00 which will go into the third column;
- ✓ The fourth column “Funding as a % of Cash-flow” calls upon LAs to compare the amount of funding received against the amount of funds actually planned to use (cash flows) to achieve their objectives within the reporting period. This is derived by dividing the amount that the LAs planned to use (figure in cumulative cash-flow column by the figure in cumulative funding column and multiplying by 100;
- ✓ The fifth column “Funding as a percentage of annual provision” calls upon LAs to compare what funding the council actually got for the programmes (figure in column 5) and what was allocated or approved budget for the programmes (figure in column 3). This is done by dividing the amount of funding the council got, column 5 and the approved budget in column 3.

3.2 Annual and Quarterly Programme Performance Information

Under PBB, LAs have an obligation to report on the expenditure they incur and the results achieved. In this regard, LAs are supposed to develop an elaborate and efficient monitoring and evaluation framework that collects disaggregated information on inputs, activities performed, the money spent, the outputs created and the outcomes. The information

collected should then be used in the PBB reporting.

A template for Annual /Quarterly Programme Performance Information is given for the LAs to fill in for each programme and sub-programme.

3.2.1 Filling in the template

The template has columns for quarterly targets and achievements.

- ✓ The LAs should indicate the annual planned targets in the first column and then for each quarter indicate how much of the planned targets have been achieved;
- ✓ At the same time the LAs are supposed to indicate what has been achieved in terms of output and outcomes for each quarter in the columns labelled Q2, Q3 and Q4.

An example of a filled in template is given on the next page for ease of reference.

[illegible]

3.3 Absorption Capacity

The reporting template has a section where LAs are supposed to report their absorption capacity - simply meaning reporting the LAs' ability to spend the money funded by treasury. An example of a filled in template for absorption capacity is given below for ease of reference.

Example: Absorption Capacity Template

No.	Programme/Sub-programme title	Cumulative Funding (A)	Cumulative Expenditure (B)	Variance (A-B)	Absorption B/A*100	Remarks
04	Water Resources Development, Management and Supply	2,000,000	2,000,000	0	100%	Implementation was smooth
04.04	Water Supply and Sanitation	2,000,000	2,000,000	0	100%	
15	Security Services	3,500,00	3,000,000	500,000	86%	Funding was delayed
15.09	National Registration and Identification	3,500,000	3,000,000	500,000	86%	

3.3.1 Filling in the absorption capacity template

- ✓ There are five columns that the LAs are supposed to fill in for each programme and sub-programme;
- ✓ The first column is Cumulative Funding (A) (column 3) – how much funding has the LA received up to the time of reporting;
- ✓ The second column is Cumulative Expenditure (B) (column 4) – which simply means the total expenditure that the LA has made up to the reporting time;
- ✓ The third column is Variance (A-B) (column 5), the difference between cumulative funding (column 3) and cumulative expenditure (column 4). For variance column, you subtract amount in column 4(B) from amount in column 3(A) (A - B);
- ✓ Column 6 is called Absorption and is calculated as a percentage as shown in the column heading;
- ✓ The last column called Remarks gives a chance to the LAs to say something about funding levels versus their expenditure, their capacity to absorb funding (capability to expend);
- ✓ The LAs are supposed to put zeros for programmes and sub-programmes which got zero despite being relevant and leave blank where the programme or sub-programme is not relevant.

3.4 Project Implementation Progress

The LAs are supposed to report on progress for all projects that they are implementing. It is recognized that some LAs implement projects that span across different budget years and as such the Ministry of Finance and NLGFC developed a template that takes care of all the projects.

Example: Project Implementation Progress Reporting Template

Project title	Estimated Imple-ments Period	Total Estimated Cost	Budgeted Amount for the year under review	Amount spent for the period under review	Amount spent in the previous period(s)	Cumulative Expendi-ture	Status of the project (including description of the work conducted)	Challenges and action taken OR to be taken to address the challenges
DDF Projects								
Programme 60 - Local Development								
Construction of a bridge on Rivirivi River	3 years	5,000,000	2,000,000	1,570,000	1,500,000	3,070,000	The project is going towards completion. The bridge supporting pillars have been erected.	Contribution and community support has been minimal. More sensitisation is being undertaken.
CDF Projects								
Programme 60267: Mzimba Hora Constituency								
Construction of school block at Bulala	1 year	1,500,000	1,500,000	1,200,000	0	1,200,000	The block is roofed and final works-plastering is remaining.	None.

3.4.1 How to fill the Project Implementation Progress template

- ✓ The LAs should give the name of the project;
- ✓ The second column should contain the planned period that the project is expected to be completed;
- ✓ The LAs should put the estimated cost up to the completion of the project in the third column;
- ✓ The fourth column should be filled with the amount of budget allocated to the project for the reporting year as shown in the example above;
- ✓ The LA should put in the fifth column the amount of resources that have been spent within the reporting year for example 2019/2020 up to the time of reporting in the 9th month;
- ✓ The sixth column should be filled with the amount of funds that were spent on the project before the reporting year;
- ✓ The LAs should put the cumulative expenditure on the project since the start of the project in the seventh column;
- ✓ The eighth column should be filled with information regarding the work that has been accomplished up to the time of reporting and the status of the project i.e. what proportion of the project has been completed so far and may include its usability up to that level;
- ✓ The last column requires LAs to give information on challenges encountered on implementing the project for the reporting year and the actions that were taken to address the challenges.

Note: The column labeled “year under review” simply would like to get information for the year being reported on since some projects are implemented over several budget years for example when reporting a project that will be implemented over 3 years, the column is interested in information for the year under review

It is encouraged however, that LAs should always implement projects that fit in one year for ease of budgeting and project progress reporting.

3.5 Major Budget implementation Challenges

This section calls upon the LAs to identify and report major budget implementation challenges experienced during implementation of the budget in the reporting period and also the corresponding measures/solutions applied or to be applied in order to resolve those challenges. An example of a filled in template is shown in the screenshot below for ease of reference.

VII Major Budget Implementation Challenges and Proposed Solutions

No.	Challenge	Proposed Solution(s)	Responsible Entity	Timeframe
1	Communities not willing to participate	Sensitization of the community on the development intervention	Community Development section	April to May 2019
2	Lack of specialised technical expertise	Engage a consultant	The DPD	June 2019

3.5.1 Filling the Template

- ✓ The LAs should fill the second column with information on the major challenges in implementation of the budget which is identified during the course of implementation;
- ✓ The third column should contain the information on what the LA propose as solution to resolve the challenge;
- ✓ The fourth column should contain the identified responsible entity/office for implementation of the solution;
- ✓ The fifth column should give a time period when the solution is expected to be implemented to resolve the challenge.

The major challenges must be limited to policy or technical challenges faced during the implementation of the budget and not the negative situation as identified through situation analysis.

3.6 Additional Information for PBB Reporting

3.6.1 Data Collection and Generation

For effective functioning of PBB, reporting of expenditure and the results that are achieved is very crucial. In this regard, LAs should ideally develop elaborate and efficient monitoring and evaluation frameworks that collect, analyses and stores disaggregated information on all programmes and projects that the LA is implementing. Information on inputs, activities, outputs and outcomes should be collected and these should form the source of information when filling the PBB performance templates provided by NLGFC.

3.6.2 Posting expenditure

When implementing the various programmes and projects, it is important that the implementing agencies within the LAs post their expenditures under the relevant programmes and sub-programmes for proper classification of the expenditures. The DoF and the heads of departments should ensure that this is done because it helps to accurately report on the expenditures for programmes and sub-programmes.

Appendix 1: Extracting Programme Budget by Item and GFS Information from Input Data Sheet

A: How to Extract Programme Budget by Item from Input Sheet

- Obtain the completed Input data sheet
- Go to sheet named Program Budget by Item
- Right Click and go to show field list, select(tick) vote2, Program2 and Item. Once selected the pivot table should look like one shown below:

A	B	C	D	E
ote2	Program2	Item	Sum of 2019 - 2020 Expenditure Estimate2	Sum of 2019 - 2020
1908 - Karo	04. Water Resources Development	21 - Internal travel	2,258,963	-
		23 - Public Utilities	889,000	-
		24 - Office supplies and expenses	906,333	-
		29 - Acquisition of technical services	96,333	-
		33 - Other goods and services	120,000	-
		34 - Motor vehicle running expenses	2,240,000	-
		35 - Routine Maintenance of Assets	1,800,000	-
		41 - Acquisition of Fixed Assets	1,130,000	-
		50 - HIV/AIDS Intervention	192,666	-
		61 - Sector Funds	-	9,633,295
	04. Water Resources Development, Management and Supply Total		9,633,295	9,633,295

B: How to Extract Programme Budget by GFS information from Input Data Sheet

- Obtain the completed Input data sheet
- Go to sheet named Program Budget by GFS
- Right Click and go to show field list, select(tick) vote2, Program2 GFS
- Under the list of program select each programme one by one and lump the GFS for that programme using excel sheet

A	B	C	D	E	F	G
	Program2	GFS	2020 Expenditure	2020 Revenue		
	04. Water Resources Development	0026150	-	9,633,295	-	9,633,295
		2022103	31,606	-	31,606	-
		2022104	2,227,357	-	2,227,357	-
		2022301	79,000	-	79,000	-
		2022302	60,000	-	60,000	-
		2022305	250,000	-	250,000	-
		2022350	500,000	-	500,000	-
		2022401	130,000	-	130,000	-
		2022402	60,000	-	60,000	-
		2022407	200,000	-	200,000	-
		2022411	516,333	-	516,333	-
		2022921	96,333	-	96,333	-
		2023305	120,000	-	120,000	-
		2023401	2,000,000	-	2,000,000	-
		2023402	240,000	-	240,000	-
		2025001	192,666	-	192,666	-
		2033502	700,000	-	700,000	-
		2033503	700,000	-	700,000	-
		2033512	1,100,000	-	1,100,000	-
		4014315	430,000	-	430,000	-
	04. Water Resources Development		9,633,295	9,633,295	9,633,295	9,633,295

- The table above illustrate that we picked program for water resources only and GFS for that particular program;
- The next step is to export the information to excel in order to sort the same GFSs with their corresponding amounts together;
- To do that, go to the right corner of the sheet and copy paste special values to disable the formulas, copy the sheet to a new excel sheet and do data sort per GFS, see table below.

Program	GFS	Expenditures	
04. Water Resources Development		-	
	2022103	31,606	
	2022104	2,227,357	
	2022301	79,000	
	2022302	60,000	
	2022305	250,000	
	2022350	500,000	
	2022401	130,000	
	2022402	60,000	
	2022407	200,000	
	2022411	516,333	
	2022921	96,333	
	2023305	120,000	
	2023401	2,000,000	
	2023402	240,000	
	2025001	192,666	6,703,295
	2033502	700,000	
	2033503	700,000	
	2033512	1,100,000	2,500,000
	4014315	430,000	430,000
04. Water Resources Development		9,633,295	9,633,295

- Once you have this data you can now proceed to fill in program by GFS for water which will look like table below. Remember for GFS we only take the first three digits and ignore the last four digits. With GFS, interest is on expenditure estimates only and not revenues.

The table below shows how the programme by GFS from the above input sheet looks like.

Programme	GFS	Expenditures
04. Water Resources Development, Management and Supply		-
Goods and Services	202	6,703,295
Routine Maintenance	203	2,500,000
Acquisition of Fixed Assets	401	430,000
04. Water Resources Development, Management and Supply Total		9,633,295
